tem. It supports the Company's values, vision, strategy and the attainment of its earnings objectives.

To this end, SRV ensures that it has a systematic and comprehensive approach for identifying and assessing risks, and also for reporting on operations and implementing any required risk management measures. The annual Group-level risk management process comprises the identification of material risks related to the Company's operations, assessment of the status of risks, and the planning of measures to eliminate risks or mitigate their impacts. Risks identified during this process are rated in terms of their severity. Continuous risk management of various operations, development projects, construction projects and investment projects is planned and implemented on a function-by-function basis.

Overall responsibility for risk management rests with the Company's Board of Directors and the President & CEO. The Board of Directors approves SRV's risk management strategy and policy, and assesses its Group-wide framework for risk management. The Audit Committee reviews a quarterly

report on operational risks and reports on them to the Board of Directors. Line management is in charge of implementing, leading and supervising day-to-day risk management for both business in general and individual projects. The Group's risk management function supports the application of risk management policies and develops Group-wide ways of working.

General description of internal control

SRV continuously monitors its functions to ensure the reliability of its result. Internal control seeks to ensure that the Company's operations are efficient and productive, reporting is reliable, and laws and regulations are complied with. However, the internal control system cannot provide full certainty that risks will not be realised.

SRV's business operations are guided by consistent Group-wide business principles, decision-making authorisations and the Company's values. Internal control is founded on a healthy corporate and management culture, and on specified reporting and its fundamental principles. In particular, internal control is based on financial reports, management reports, risk reports and internal audit reports. The Company's main operations are controlled by means of internal instructions, operating policies and procedures. The Board of Directors has approved the Group's internal decision-making authorisations.

Financial control

The internal control system is the responsibility of SRV's Board of Directors and Audit Committee, the Corporate Executive Team, the executive teams of SRV's business areas, and financial administration. Management's monthly financial reporting is a key control process in ensuring the accuracy of the Group's financial reporting. It includes analyses of deviations between actual results, budgets and continuously updated forecasts. An external auditor audits finan-

cial reporting on a regular basis and reports directly to the Audit Committee.

The internal control system applied to business operations is the responsibility of the executive teams of SRV's business areas and the Group's controller function, in accordance with SRV's Group policies and instructions. Monthly financial reporting is a key control process in ensuring the effectiveness and efficiency of operations. It also includes analyses of deviations between actual results, budgets, and continuously updated forecasts for overall financial performance and individual construction projects.

Financial management and operational control are supported and coordinated by the Group's financial administration and the SRV's controller function. SRV has drafted Group-level reporting models for standardising the financial reporting of its business functions. Their reports seek to ensure that control covers all the major aspects of SRV's business operations. This ensures that any deviations from financial objectives are identified, communicated and reacted to efficiently, in a harmonised and timely manner.

Financial control measures also include management's continual business control procedures. Financial reports define key control indicators that aim to measure and support business efficiency and consistency, and to monitor progress towards the attainment of SRV's objectives.

Reliability of financial reporting

The monitoring of financial reporting reliability is based on the principles and guidelines SRV has defined for the financial reporting process. The interpretation and application of financial statement standards, including compliance with these standards, are centralised in the Group's financial administration, which is supervised by the Company's Audit Committee. Budgeting and reporting processes are based on SRV's internal instructions. The Group's financial admin-

istration is responsible for drafting and maintaining these instructions centrally. These principles are applied consistently throughout the Group.

Internal audit

The internal audit is part of SRV's internal control framework. It is an independent, objective and consulting function that is designed to create added value and improve the functions of the Company. The internal audit is intended to support the Board of Directors and management in the monitoring of good administration, internal control the efficiency of risk management. This function carries out independent audits of business functions, Group companies, processes and especially of selected targets to ensure the functionality of internal control. The internal audit seeks to ensure compliance with internal policies, guidelines and regulations.

It operates under the supervision of the Audit Committee and reports on its observations to the Audit Committee, which in turn reports to the Board of Directors. The Audit Committee confirms the annual plan for the internal audit. The focus areas of the internal audit are identified risks in business operations. The Group's CFO has administrative responsibility for the functionality of the internal audit.

The 2019 internal audit was performed by a chosen external service provider Ernst & Youn Oy. Internal audits were carried out in 2019 in accordance with the annual plan for internal audits.

Other information

Insider administration

The Company complies with the insider guidelines approved by the Board of Directors. This insider policy describes essential rules, instructions and procedures concerning market abuse and, in particular, the prohibition on market manipulation and using insider information.

According to the Market Abuse Regulation (MAR), the Company's management includes the members of SRV's Board of Directors and the President & CEO. Management and their close circle must report all business transactions involving the Company's securities to both SRV and the Financial Supervisory Authority. The Company will issue a stock exchange release on all such transactions.

SRV's management may not trade in the Company's securities (either in person or through a third party) during a 30-day "closed window" before the publication of each of the Company's financial statement bulletins or interim reports, and not on the date of publication of the Company's interim reports or financial statement bulletins. This prohibition remains in force whether or not the person in question is in possession of any insider information at the time.

The Company maintains and updates a register of those who regularly receive unpublished financial information via their position or authorisations ("those who participate in the preparation of financial reviews"). The closed window and non-disclosure obligations also apply to these individuals, and they are also forbidden from providing information or advice to others for the purpose of trading in the Company's securities.

SRV draws up a list of individuals who have access to insider information and who have signed an employment con-

tract with the Company, or who otherwise perform duties which grant them access to insider information. SRV does not maintain a permanent insider register. Instead, all individuals participating in insider projects are included in project-specific insider lists. Anyone whose name appears on one of these lists may not trade in the Company's securities until they have been notified that any trading restrictions have been lifted.

SRV recommends that trading be restricted to situations in which the market is in possession of the most comprehensive information about factors affecting the Company's securities, that is, after the publication of an interim report or financial statement bulletin. SRV recommends that those who are in a management position or prepare financial reviews should make long-term investments rather than trading in securities belonging to or related to the Company. Insider policy forbids the aforementioned individuals from engaging in short-term trading and speculative activities with securities belonging to or related to the Company.

SRV's insider administration organisation consists of the General Counsel, the person responsible for insiders, and the insider register custodian. Insider administration is responsible for the daily management and supervision of compliance with the MAR and SRV's insider policy, which

includes tasks such as maintaining insider registers, supervising insider issues, arranging training, giving advice, and sending notifications to management, insiders and other relevant organisations. SRV's insider administration function cooperates with the Company's communications, which handles the publication of management's business activities.

The auditor is elected at the Annual General Meeting to a term of office that ends at the close of the next Annual General Meeting following the auditor's election.
